

bauhaus imaginista

100 years of bauhaus

bauhaus imaginista presents the exhibition *Moving Away* at the National Institute of Design, Gandhinagar. **This exhibition focuses on how principles in design and architecture from the Bauhaus have been adapted, expanded and contested in different social and political contexts.** These include the former Soviet Republics, India, North Korea and China. The title of the exhibition indicates how the migration of Bauhaus ideas was never a case of pure dissemination, but instead these ideas were accepted and rejected in relation to local conditions and against a backdrop of geopolitical change in the twentieth century.
